INDICATIONS
<ul style="list-style-type: none"> For primary response when the location where the patient is picked up is closer to the Perimeter Highway than any other regional health care facility <u>and</u> the patient has a known or suspected obstetrical / maternal condition listed in table A, including care or resuscitation of the newborn / neonate

CONTRAINDICATIONS
<ul style="list-style-type: none"> Not applicable

NOTES

- | |
|---|
| <ol style="list-style-type: none"> 1. A facility is considered closest if it has the shortest estimated transport <i>time</i> from the patient's current location. When two facilities have similar transport times, closest is that which has the shortest estimated transport <i>distance</i> from the patient's current location. 2. Paramedics may be advised to transport the patient directly to the labor & delivery unit at either facility. 3. Paramedics will ensure appropriate pre-arrival notification of receiving facility staff and update as necessary. |
