	E14 - SEIZURE	
	All ages	MEDICAL
Version date: 2023-08-06		Effective date: 2023-10-24 (0700 hrs)

INDICATIONS

- | |
|--|
| <ul style="list-style-type: none"> • Patients with one or more generalized seizures |
|--|

CONTRAINDICATIONS

- | |
|--|
| <ul style="list-style-type: none"> • Not applicable |
|--|

NOTES

- | |
|---|
| <p>1. Respiratory depression, hypoxemia and airway compromise are common in the post-seizure period, especially if midazolam is administered to terminate the seizure(s).</p> <p style="padding-left: 40px;">Patients may injure themselves during a seizure and it may be difficult to exclude a spinal injury if the patient has a decreased level of consciousness or altered mentation.</p> <p>2. Most seizures resolve spontaneously within a few minutes and rapid administration of a benzodiazepine is often not required if it appears that the seizure is resolving or has resolved. If in doubt, consult the on-line medical support (OLMS) physician.</p> |
