New Immunology Requisition

Effective Date: May 25, 2015

Revisions to the Immunology requisition have been made due to the implementation of the new BioPlex analyzer at the St. Boniface site.

The requisition will be available on the DSM website via the Lab Information Manual link <https://apps.sbgm.mb.ca/labmanualviewer/findRequisitions.action>
For internal use, the requisition (form #54105) is available from the HSC print shop.

Please do not use the old requisition after May 25 as it will contain outdated LIS test codes. Use of the DSM Immunology requisition is recommended to ensure that the correct testing is performed in a timely manner.

Physicians will be using the "Additional Tests" box at the bottom of the requisition when ordering the new individual extractable nuclear antibody tests (eg. Ribosomal P).

All revised test information (new tests, changes in reference ranges, and test codes) will be available in the DSM Lab Information Manual (LIM) effective May 25 2015.

Your cooperation is greatly appreciated.

Any questions or concerns may be directed to:
Dr. Carmen Morales, Medical Director, Hematology and Immunology Disciplines, 204-787-4682, cmorales@dsmanitoba.ca
Sheila Ozamoto, Technical Director, Immunology, 204-787-3407, sozamoto@dsmanitoba.ca
