

TRANSFUSION MEDICINE

Canadian Blood Services Test Requisitions Change**Change Effective: 1 April, 2023****Background information:**

Currently, Canadian Blood Services (CBS) provides printed copies for the following requisitions available for order from either CBS directly or via a site's supply process:

CBS Reference Number	Name	Shared Health SAP
1000107837 (XM101A)	Request for Pre-transfusion Testing	318008
1000107830 (XM101)	Request for Blood Components	350006
1000107827 (Rh101)	Request for Perinatal Testing	220751
1000107834 (XM104)	Request for Miscellaneous Testing	214565
1000104677 (N/A)	Platelet Immunology Laboratory	220749

Clinical Resource:

As of **April 1, 2023**, CBS will no longer be providing printed multi-part non-carbon required (NCR) requisitions. **Shared Health Printing Services** will take over the printing of the above CBS forms to ensure sites who prefer hard copies will continue to have access to them.

Requisition ordering:

Hard copies: multi-part NCR requisitions will transition to one-page on regular white paper and will be available to order in packages of 100. Requisitions may be ordered directly from **Shared Health Printing Services** by submitting [a work order form](#) available on the Shared Health intranet or through SAP. Please feel free to contact **Shared Health Printing Services** directly for questions regarding ordering.

For all hard copy requisitions, ensure the most up-to-date version (found on www.blood.ca) is in-use.

Electronic: requisitions are currently, and will continue to be, readily available on the CBS website, <https://www.blood.ca/en/requisitions-and-forms>, as one-page pdf-fillable electronic requisitions which can be filled out then printed, or printed and completed manually.

Important Note: CBS will continue to accept all forms of the requisitions (paper multi-part filled in manually, pdf-fillable but printed and information recorded manually or electronically filled then printed) until further notice.
