

TRANSFUSION MANITOBA

Revision to the Massive Transfusion Protocol

Date issued: August 18, 2023

On August 28th, 2023, the former Massive Transfusion Protocol (MTP) will now be known as the Massive Hemorrhage Protocol (MHP) at Health Sciences Center and St. Boniface Hospital. With this name change come changes to the protocol. The changes for each facility can be found on the Transfusion Manitoba web page (healthproviders.sharedhealthmb.ca/transfusion). Committees from both facilities used a provincial framework to develop site specific MHP protocols that have brought alignment to all MHP's within Manitoba. The Protocols can be found by scanning the QR codes with your cell phone. The new documents within the protocol are listed and images of these are available for preview on the TM website found [here](#).

HSC Winnipeg
Adult Massive Hemorrhage Protocol

St. Boniface Hospital
Adult Massive Hemorrhage Protocol

The Shared Health Policy for the MHP has been changed to a Clinical Practice Guideline under the direction of senior leadership at Shared Health.

We send a tremendous thank you to the committee members for their time and commitment to the revision of this protocol.
