

SH ACPIAR**Feasibility Acknowledgement**

Projects which require services significantly outside of the standard of care/practice within Shared Health require a feasibility consideration prior to submission of the Institutional Impact Application. This feasibility consideration will include a review of all required documentation, and an Institutional Impact Application will not be accepted until this feasibility consideration has concluded.

All items determined/negotiated during the feasibility consideration are to be noted within this document. This document must accompany the Institutional Impact Application and will form part of the official record of the project.

Once Institutional Impact Application has been submitted, all further communications with the research team will be facilitated through Shared Health Research and Innovation and not with the functional area directly.

To be completed by the area which completed the feasibility consideration.

Project Title/Reference: [Click or tap here to enter text.](#)

Principal Investigator: [Click or tap here to enter text.](#)

Is this project feasible given the information provided? ☐ Yes ☐ No

Preliminary Costing Provided: ☐ Yes ☐ No

If Yes, attach a copy of the preliminary costing.
