

As your Home Clinic (primary care home base), we are making some of your key health information, such as health conditions and prescribed medications, electronically accessible to authorized health-care providers in eChart Manitoba. This allows other health-care providers involved in your care convenient access to key information from our clinic to make timely, informed decisions about your care.

## What information is being shared by our clinic?

- Health conditions and diagnoses
- Surgeries and procedures
- Suspected allergies and intolerances
- Prescribed medications
- Vital signs recorded
- Any additional information your care provider considers essential to your ongoing care needs

## What is eChart Manitoba?

eChart Manitoba is a secure electronic system that connects authorized health-care providers with a summary of your health information such as filled drug prescriptions, lab results, immunizations and x-ray reports.

## Will my information be secure?

Yes. eChart Manitoba has measures in place to protect your privacy and keep your information safe. All Manitoba's regulatory and legislative standards on protecting personal health information, including The Personal Health Information Act (PHIA) are followed. All user access is password protected, recorded, and can be audited.

## Who will be able to look at my information?

Only health-care providers with access to eChart will be able to see your information. They are only authorized to see information in your eChart record that is required to support your care.

## How will health-care providers use my information?

Health-care providers, such as your emergency or urgent care department providers and hospital staff can use the information to support and better coordinate your care.

## What if I don't want my information to be shared?

A Disclosure Directive can be placed on your eChart record. This will hide your personal health information in eChart, allowing only your name, personal health identification number, date of birth and address to be seen by healthcare providers. Certain health-care providers who have the highest level of access to eChart may temporarily override a Disclosure Directive, indicating the reason for doing so.

## How do I find more about eChart?

Visit the eChart website at [echartmanitoba.ca](http://echartmanitoba.ca) or phone 1-855-203-4528 (toll free).
