

## Home Clinic Portal – Did you know?

**In the Pending Activities screen, you can now print all outstanding activities to help with remediation work**

- You can filter by rejection type, reason and date prior to printing to help sort workload. The document will print based on your selection.
- By default, the Pending Activities are filtered to the last three months. If you have older notifications, ensure the "From" date is backdated to capture all outstanding items.

## Home Clinic video

For more information on remediating records, watch the **Notifications and Remediating Enrolment Records** video in the Home Clinics Supports section of our [EMR Video Library](#) or at [https://youtu.be/LOeVA9GP\\_mg](https://youtu.be/LOeVA9GP_mg)

## EMR Certification update

- A new EMR Product has achieved certification in Manitoba

For more information, visit <http://www.manitoba-ehealth.ca/emr-cert-product.html>

## New report coming soon!

There is a new **Primary Care Report** for Home Clinics coming soon. This report has been designed with the input of primary care providers and clinic managers, and uses data from the Home Clinic Portal, Primary Care Data Extract and Claims Processing System. The **Primary Care Report** will provide a provincial overview of primary care as well as detailed statistics for the Home Clinic and its associated providers. Each Home Clinic's report will be sent to their Primary Contact.

**It is strongly recommended that Home Clinics confirm their Primary Contact information in the Home Clinic Portal**

Detailed instructions can be found in the Log on and Manage Contacts sections of the Home Clinic Portal User Guide or by contacting the Home Clinic team.

### Home Clinic Portal User Guide
