

Home Clinic information sharing

Home Clinics will soon have the opportunity to sign up for the Home Clinic Client Summary Service. This service will enable the sharing of key health information on enrolled patients from Manitoba Certified EMRs to eChart Manitoba, the provincial electronic health record. The resulting Client Summary document will be available to authorized users in eChart in support of the provision of care outside the Home Clinic.

What Home Clinics need to know about the Home Clinic Client Summary

eChart
MANITOBA

Client Summaries will be available in the Primary Care Home Clinic folder in eChart within the Clinical Documents tab

When using the Client Summary Service, your Home Clinic will be a source of primary care information to eChart. This means that enrolled patient information entered into your EMR may be seen and used in planning care for your patient by other authorized users of eChart. Home Clinics should become familiar with the contents of the Client Summary document and understand where the data elements are located within their Certified EMR. To learn more about Client Summary data elements, read our [Quick Reference Guide](#).

Benefits of using the Home Clinic Client Summary include:

- Reduces calls to your clinic for basic information
- Provides other health-care providers a more informed starting point when caring for your patient
- Supports your role to provide comprehensive patient care and coordination of care with other health providers

Your Home Clinic Liaison is here to help

Your designated Home Clinic Liaison can provide customized support to your clinic and is available by phone, email or for clinic site-visits (virtually as needed). Help is available from your Liaison for continuous quality improvement activities related to optimizing EMR data quality and providing advice and education on EMR workflows to best support patient enrolment, the generation of high quality primary care data extracts and submission of clinical data for the development of comprehensive Home Clinic Client Summary documents in eChart.

Contact your Home Clinic Liaison directly or the Home Clinic team at: E: homeclinic@sharedhealthmb.ca | Ph. (204) 926-6010 | Toll free 1-866-926-6010

How to start using the Client Summary Service

Prerequisites include:

- Being an active Home Clinic
- Use of an EMR certified to both the Home Clinic Enrolment Service and the Home Clinic Client Summary Service
- Implementation and active use of the Home Clinic Enrolment Service

Once prerequisites have been met, Home Clinics can submit an [eHealth_hub Service Intake Form](#).

Enrolment questions answered

Q. What should we do if our Home Clinic becomes aware that one of our enrolled patients is now deceased?

A. The recommended approach is to de-enrol the patient in your EMR, preferably using the deceased date as the termination date.
