New updates to the COVID-19 Unvaccinated Clients Report

In early March, the weekly COVID-19 Unvaccinated Clients report was replaced with the COVID-19 Unvaccinated and Unboosted Clients report. This report includes:

- A provider-based and age-grouped list of unvaccinated and partially vaccinated patients, with the addition of those aged 18+ who have NOT received a third dose/booster and whose last dose is >6 months and are not scheduled to receive a COVID-19 vaccination in the next 30 days.

- Additional columns entitled Second Dose Date, Second Dose Vaccine, and Anticipated Action.

This scheduled report is available in PDF and Microsoft Excel formats and will be updated on a weekly basis.

Further details can be found in the updated Quick Reference Guide Accessing Scheduled Report: COVID-19 Unvaccinated and Unboosted Clients or in the Home Clinic Portal User Guide.

For information about Manitoba's COVID-19 Vaccine Eligibility Criteria please visit https://manitoba.ca/covid19/vaccine/eligibility-criteria.html.

Introducing the Home Clinic Toolkit

The new Home Clinic Toolkit is on the Shared Health website and is available to assist Home Clinics with locating, accessing and navigating through important and helpful online resources. The Toolkit offers practical advice, guidance, and tools your Home Clinic can use to support operational activities and EMR data quality improvement.

The Toolkit includes seven dedicated sections that house a variety of resources to help Home Clinics complete operational activities and work towards improving EMR data quality. A Content Matrix has been provided to help with locating and navigating to resources based on your areas of interest.

We encourage Home Clinics to visit the online Home Clinic Toolkit to see all the resources that are available for support. Click on the section that interests you then click on any of the included resources to access the content. Use the menu on the right side of the page to navigate back to the main Toolkit page or to other sections.

Visit the Home Clinic Toolkit to access more information on:

- EMR integrations and provincial services available to Home Clinics

- EMR Optimization Modules to support EMR data quality improvement

- 5-minute eLearning videos on important Home Clinic topics

- Templates and worksheets to help with patient communications and quality improvement activities

- Quick Reference Guides for the Home Clinic Portal and Tip sheets on Home Clinic processes and workflows

- Frequently Asked Questions to help Home Clinics understand the initiative and their operational activities

- Content Matrix to help find the content you need quickly and easily

If you have questions about the Home Clinic Toolkit, contact your Home Clinic Liaison or the Home Clinic team at 204-926-6010, toll-free 1-866-926-6010, email: homeclinic@sharedhealthmb.ca

Maintaining your Shared Health services

To reduce the risk of interruptions to Shared Health services (e.g., eChart, eHealth_hub, etc), return the completed Clinic Change form four weeks prior to any changes, such as:

- Ownership or legal name

- EMR vendor

- Internet service provider

- Moving a clinic to another location

eChart 2022 is Coming Soon

eChart Manitoba is preparing to migrate approximately 16,000 users to eChart 2022 in the coming months. Authorized Sponsors will receive email communications from eChart Manitoba with details regarding access to eChart 2022.

eChart
MANITOBA

A Shared Health Service

Why is the upgrade needed?
The current version of eChart runs on Internet Explorer (IE) which will be at its end-of-life soon. eChart 2022 accommodates modern browsers. As well, an upgrade is required to continue with vendor support.

What else will be different with eChart 2022?
eChart 2022 has a brand-new look and feel that empowers the user to customize their view and save time by accessing clinical information in an easy-to-read format.

Features include:
- The ability to personalize display preferences and save them as a default
  - Category View – grouped by clinical domains (e.g., Labs Medications, Immunizations, etc.)
  - View by Date – reverse chronological order
- Option to select between three different text sizes
- Ability to set default view for preferred categories
- Adjustable window size to take advantage of full screen real estate - no more white space

As an eChart user, how can I familiarize myself with eChart 2022?
Users are strongly encouraged to watch the eChart 2022 eLearning video before using eChart 2022. It will be made available on the eChart Manitoba website at the beginning of May.

See What's New on the eChart Manitoba website for monthly updates. Check the status of your EMR to see progress towards the eChart Manitoba Version 2.0 upgrade.

Find previous editions of the EMR Connection on our website.
