

EMR integrations that support enrolled patient care

Home Clinic Enrolment Service

What is Home Clinic enrolment?

Enrolment formalizes the relationship between a patient and their chosen Home Clinic. Home Clinics register with Manitoba and agree to provide continuous, comprehensive care throughout an enrolled patient's life. Enrolment information is stored in the Home Clinic's EMR, submitted to a provincial repository, and made available in eChart Manitoba. Patients can only enrol with one Home Clinic and they are responsible for maintaining accurate enrolment information over time.

What is the Home Clinic Enrolment Service?

The Home Clinic Enrolment Service is an eHealth_hub interface that provides the ability to enrol patients and manage patient enrolment from within a Certified EMR. This service provides Home Clinics with an efficient method to manage client enrolment and submit the enrolment data to the provincial enrolment repository in a timely fashion.

Key highlights:

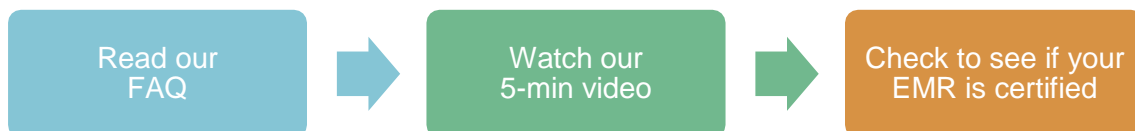

- Connects your EMR directly to the provincial enrolment repository
- Improves accuracy and timeliness of enrolment
- Reduces enrolment rejections
- Enables validation of patient enrolment directly from within the EMR
- Provides notifications of enrolment conflicts directly from within the EMR
- Provides ability to remediate enrolment errors directly from within the EMR
- Eliminates manual entry of enrolment into the Home Clinic Portal
- Enrolment details are available in eChart Manitoba to support communication back to the Home Clinic in support of continuity of care

How do I apply for the Home Clinic Enrolment Service?

Once your EMR is certified to the Home Clinic Enrolment Service, your Home Clinic can apply by visiting the [eHealth hub page](#) on the Shared Health website.
