

Management of Metabolic Dysfunction Associated Steatotic Liver Disease (formerly Non-Alcoholic Fatty Liver Disease)

Date issued: June 26, 2024

To: Primary Care Providers

Cc: Dr. Eberhard Renner

Re: **New Provincial Clinical Guideline for the Management of Metabolic Dysfunction Associated Steatotic Liver Disease (MASLD)**

From: Provincial Clinical Leadership Team

Dear Colleagues,

The provincially approved **Provincial Clinical Guideline on the Management of Metabolic Dysfunction Associated Steatotic Liver Disease (MASLD)** is being rolled out to primary care providers and their teams who provide care for patients with MASLD to allow them to adequately manage the majority of these patients in their practice, and to improve appropriate access to specialist care for the subset of MASLD patients that require it.

This clinical guideline is going to take effect immediately.

Please ensure all staff and physicians in your Primary Care Clinic are aware of and familiar with this new provincial clinical guideline.

The guideline and supporting material is available at [Shared Health Clinical Projects, Standards, and Guidelines](#):

- **Guideline:** [Management of Metabolic Dysfunction Associated Steatotic Liver Disease \(MASLD\)](#)

We appreciate your support as we move towards evidence-based practice to optimize our delivery of timely services in the province.
