

Manitoba Centre[®]
Poison antipoison
Centre du Manitoba

Jan 7, 2021

Dear Health Care Professional,

In an effort to help streamline your call experience with the Poison Centre, we have created a 2-page documentation tool that can be used during your consultation, at your discretion.

The first page of this fillable form is meant to be completed prior to calling the Poison Centre to optimize efficiency during the call. It includes relevant patient information, presentation, and treatments already initiated by your facility.

The second page covers the recommendations from the Poison Specialist you speak with and is organized into several sections: identified priorities, specific labs to be drawn, and treatment recommendations.

This form is meant to be a useful tool; it is *not* meant to serve as an order set, nor should it be considered an official chart document. All recommendations from the Poison Specialist must be reviewed and verified by the Most Responsible Physician (MRP).

This form will be available for download at <https://sharedhealthmb.ca/health-providers/manitoba-poison-centre/>.

We hope that this will be helpful in creating a more organized and efficient consultation experience when calling the Poison Centre.

Sincerely,

Specialists in Poison Information

Manitoba Poison Centre
