

Home Clinic Portal Release Notes March 7, 2022

Scheduled Reports – COVID-19 Unvaccinated and Unboosted Clients

Please be aware that as of March 6, 2022 the weekly COVID-19 Unvaccinated Clients report has been updated in the Home Clinic Portal.

A summary of the change is included below:

- The COVID-19 Unvaccinated Clients report has been replaced with the **COVID-19 Unvaccinated and Unboosted Clients**. This report includes:
 - A provider-based and age-grouped list of unvaccinated and partially vaccinated patients **with the addition of those age 18+ who have NOT received a third dose/booster** and whose last dose is >6 months and are not scheduled to receive a COVID-19 vaccination in the next 30 days
 - Additional columns entitled Second Dose Date, Second Dose Vaccine, and Anticipated Action
 - Removal of subtotals for each age grouping

Please be aware that the primary series for immunocompromised patients may be 3 doses. Therefore, immunocompromised patients due for their booster/4th dose will not appear in this report. These patients require special consideration.

In addition, the Anticipated Action column will indicate DETERMINE NEXT DOSE when the patient is identified as receiving a non-Health Canada approved COVID-19 vaccine, a COVID-19 treatment or other dose variations. Further review may be required.

Please note that this scheduled report is available in PDF and Microsoft Excel formats and will be updated on a weekly basis.
