

Home Clinic Portal Improvements: Scheduled Reports and Pending Activities

On Tuesday, May 2 improvements will be made within the Home Clinic Portal. You'll see changes within the Scheduled Reports page, which provides you with easy access to weekly or monthly reporting about patient enrolment (e.g. rejections, number of enrolled patients, etc.). We've also enhanced the Pending Activities page to help with record remediation. Both changes, illustrated below, were made with efficiency in mind.

Scheduled Reports

The list of available reports will display in alphabetical order.
