

## Home Clinic Portal news!

You are receiving this message because your primary care clinic is an active Home Clinic. The Home Clinic Portal was updated on Tuesday, October 31<sup>st</sup> to improve your Home Clinic Portal experience. A summary of the changes is included below. Further detail can be found in the [Home Clinic Portal User Guide](#).

### 1. Enrolment

- Enrolments entered individually (i.e. manually) in the Home Clinic Portal will be processed overnight to ensure consistency across enrolment submission methods.
- The Enrolment Wizard in the Home Clinic Portal has been updated to enhance a user's experience when entering enrolment directly in the portal.
- A new enrolment rejection (RDOB – Date of Birth) has been added. RDOB will occur when a client's Enrolment Start Date is earlier than the client's Date of Birth.
- A new feature called "As Of" has been added to allow a user to select a previous calendar date when viewing client enrolment information. This permits a user to know what state the client enrolment was in on a particular day in the past.

### 2. Miscellaneous

- Users can now print a list of outstanding pending activities.
- When viewing notifications in the Home Clinic Portal, a detailed list of client's associated to the notification has been provided. To access the details, select a row in the Notifications table and download the report in your preferred format.

The Home Clinic team is available to assist you Monday through Friday from 8:30 a.m. to 4:30 p.m.
