

Manitoba Tobacco Quit Card and Counselling (TQCC) Program Information for clinics where a Tobacco Educator documents in a non-RHA ACCURO EMR

Thanks for partnering with us in delivery of the Manitoba Tobacco Quit Card and Counselling (TQCC) Program!

The Tobacco Quit Card and Counselling data collection tool has been updated, and is attached if you are unable to obtain it from the Accuro EMR repository below. This tool is used by Tobacco Educators in your clinic to monitor patients in your clinic accessing this program. There are data elements that are collected for program operations and monitoring.

We would like to request that you make the TQCC Data Collection Form available within your EMR so that active use of the form by clinicians can begin on April 1, 2025 (not before then). Only aggregate data will need to be provided to your RHA TQCC Lead. More information regarding reporting timelines will follow.

Tobacco Educator(s) may initially document on a paper copy of the Data Collection Tool, but responses will need to be keyed into the live Tool when available (information contained in a copy hand scanned into the EMR will not be reportable).

You are encouraged to communicate with the vendor to get help as required and to check that the Tool and output files are correctly built.

More information on the output files requested will follow.

How to Access the new Data Collection Tool for Clinics using Accuro

If your clinic uses an **Accuro EMR**, please download the Tool from the provincial repository – see screen shot below for required steps. Please ensure to download the version for your specific RHA.

When it comes time to report on the data, the reportable field tags are included in the form, so data should pull as required. **Most of the fields need to be set up as reportable fields.** This includes **all fields except** the first 4 checkboxes on page 1 (on the eligibility criteria).

The screenshot shows the 'Form Publisher' window with the search term 'Tobacco' entered. The search results table is as follows:
