

Clinical Practice Change Alert

August 19, 2016

COLLECTION for RQ BCR ABL1 SAMPLES

Effective: Immediately

The Molecular Hematology Laboratory will now require **two full EDTA tubes** (2.7 mL or greater) when sending patient samples for quantitative BCR ABL1 testing. These tests include p190 and p210.

All Physician Alerts and Clinical Practice Changes are available on the DSM Intranet <http://dsmanitoba.ca/medical-practitioners/physician-information/>

Please contact the undersigned with any questions or concerns:
