Immunology Autoimmune Laboratory Requisition

Date effective: **October 1, 2022**

Background Information:

The Shared Health Immunology Laboratory at St Boniface Hospital has revised its requisition to include recent changes, test additions and upcoming new tests.

Important Changes/ Reminders:

- Requisitions are owned and document controlled by Shared Health Diagnostic Services and cannot be altered for site specific use unless approved by Shared Health Diagnostic Services.
- Accreditation requirements require certain data on each requisition: mandatory fields are marked with * or ♦. Failure to include required information may result in specimen / collection rejection.
- Requisitions have been sent to the EMR vendors and print shops. Contact them for assistance if needed.
- All tests requested should be used for direct patient care and decision making. Be intentional about what tests will provide the best information to manage the patient.
- If completing forms on behalf of others and the clinician order doesn't clearly match the tests on this form, contact them to clarify: do not guess.

Action Required:

Please remove all old requisitions from your site and replace with this new version (V02) which can be found on the LIM (Laboratory Information Manual) or in your site EMR, **effective October 1, 2022**.

References/Resources:

Requisition: Immunology Autoimmune Laboratory Requisition
Document #: R250-10-85 V02
Print Shop: SAP Material # 346477

Note: The Requisition will not be updated in the LIM (Laboratory Information System) until October 1.
