

## DIAGNOSTIC IMAGING

## Knee MRI Appropriateness Checklist

Date issued: January 31, 2025

---

Shared Health Diagnostic Services is expanding our MRI Choosing Wisely initiative to include Knee MRI. This Clinical Practice Change will require Primary Care Providers to include the Knee MRI Appropriateness Checklist when requesting Knee MRI exams. This will improve the appropriateness of MRI examinations across Manitoba.

**As we prepare for the full rollout of this initiative in the coming weeks, we will be releasing resources to provide information and support on the project, including what to expect from the new checklist and what will be changing for providers.** This will include a pre-recorded video to allow providers and staff to watch at their convenience.

The video will be available [here](#) on Friday, February 7, 2025.
