

# Lexidrug – How to Use Advanced Search

From the opening screen, use the Advanced Search link to narrow your search to specific areas within Lexidrug.

Enter at least 2 letters of any keyword (i.e., drug, lab, disease) in the search box. Suggestions will appear and can be selected from the drop down or complete the keyword and use either the Enter key or click on the Search icon.

Search Results for "hemorrhage" in Adverse Reactions

DRUG SEARCH RESULTS - 582 RESULTS

Example: Determining which medication cause adverse reactions for hemorrhage

Once you click on the link, a new box opens with options of areas to which the search can be targeted. **Options include:**

- All Text
- Monograph Name
