

Shifting from WHY to HOW:
Operationalizing Planning Systems in
Meeting Provincial Primary Care
Priorities and Program Design Requirements

Melanie Mackinnon, Executive Director, Ongomiizwin

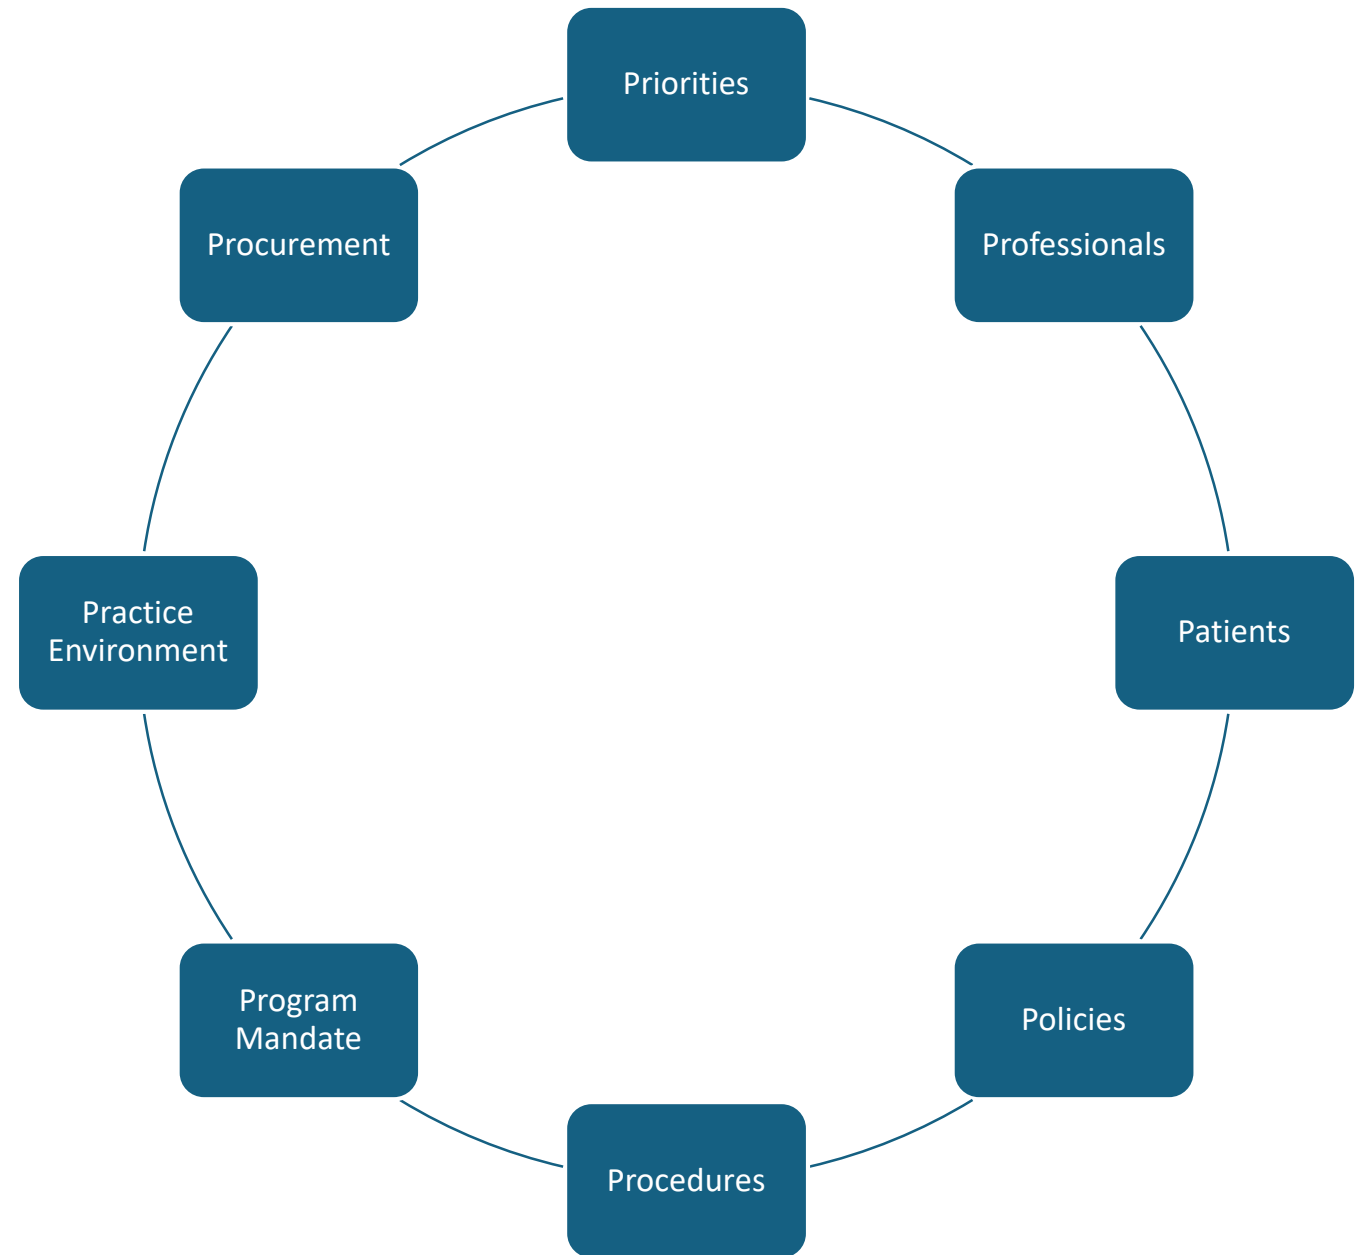

Overview

Introduce innovative strategies for improving primary care through three layered frameworks:

- Octagon Planning System
- RESPECT Trend Analysis
- 4-Directions Risk Impact Assessment Model.

Octagon Planning System™ (OPS)

Interconnectedness of health priorities, professionals, patients, policies, procedures, program mandates, practice environments and procurement that are required enhance primary care delivery

RESPECT Trend Analysis™

Examine the multifaceted influences affecting primary care, including social determinants and technological innovations.

Relationships

Economics

Social Factors

Political Climate

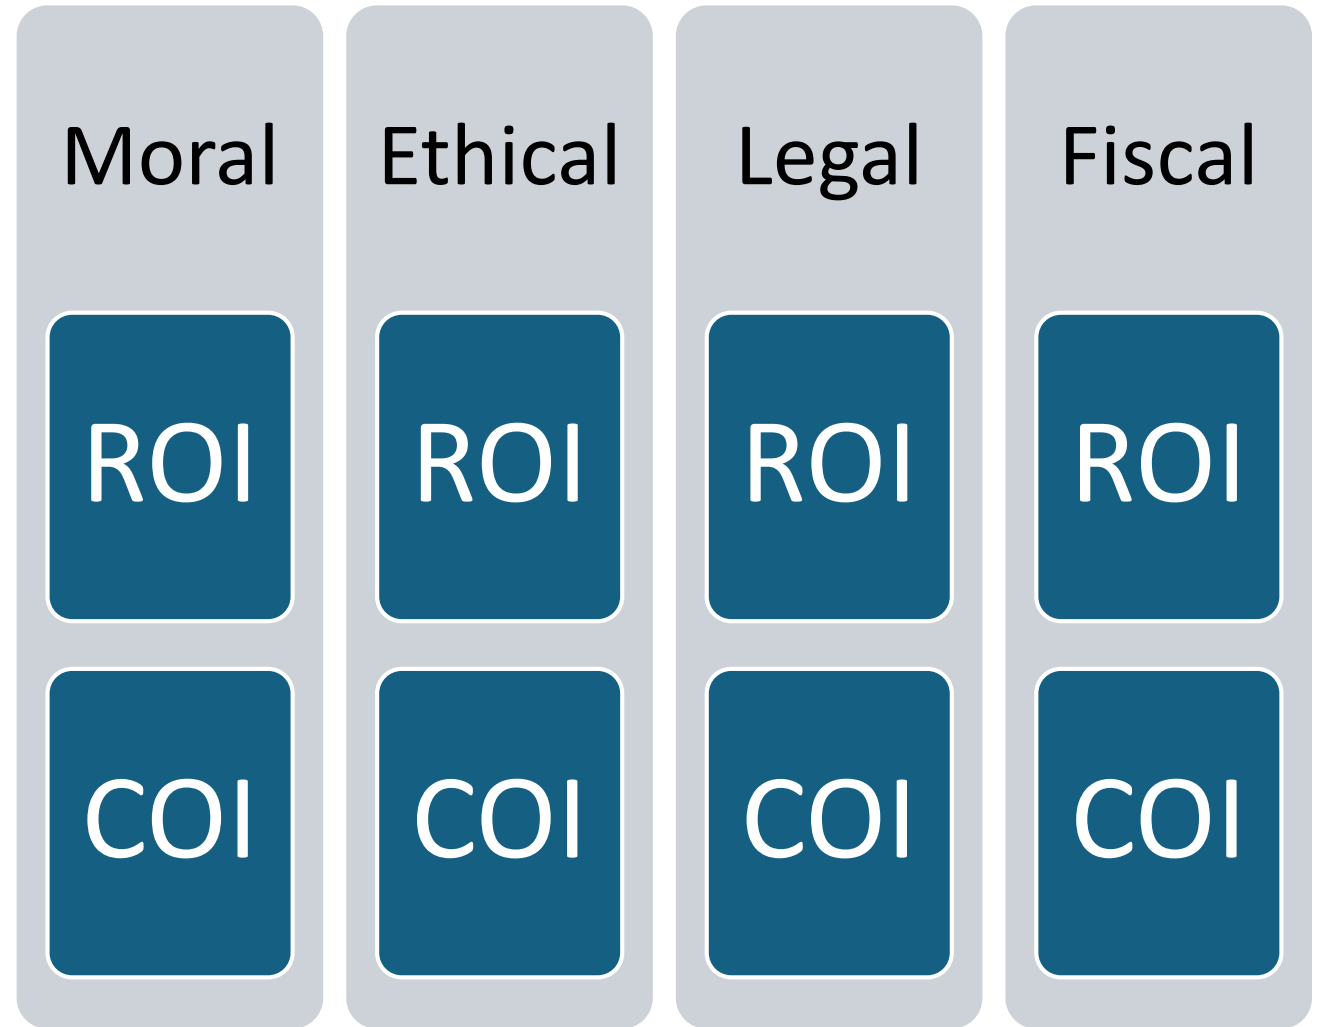

Environmental Conditions

Clinical Scopes of Practice

Technological Advancements

4-Directions Framework™

Assess moral, ethical, legal, and fiscal implications of proposed changes in primary care, ensuring comprehensive risk and impact analysis. Examine the Return on Investment (ROI) and the Cost of Inaction (COI)

Questions

Facilitated Table Discussion

- Please designate one person at your table to take notes – there is a template on your table
- Take 15 minutes to discuss and record your reflections on the following questions:

What are the current disablers to advancing Indigenous perspectives in your organization?

What enablers currently support this work?

Identify one opportunity to disrupt the status quo, leading to innovation.
